Cell Marque™ Tissue Diagnostics Presents

HISTO HEROES

I Felt it in My Chest

The life science business of Merck
KGaA, Darmstadt, Germany
operates as MilliporeSigma in the
U.S. and Canada.

Meanwhile at HistoHero University...

A familiar hero makes a visit in search of answers....

You're in the right place. Let me introduce you...

...to the new team!

What a nice surprise, **diagnostica!** What brings you back to HHU?

Bolts of lightning suddenly fill the room...

Diagnostic curiosity!

My **STAFF OF TRUTH** revealed a man's face to me last night. I believe I have been led here to uncover the truth. Do you know anyone who can help me, Histoman?

Hi! I'm **Rapido**, your new favorite speedy Histohero! And this is...

GASP!

A large figure towers over Diagnostica, startling her...

You're in great hands. Good luck with your case!

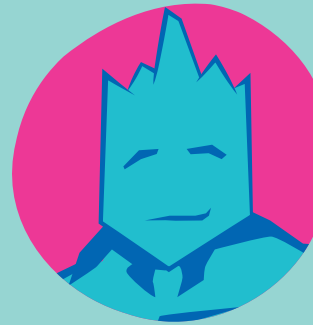

So, how can we assist you, Diagnostica?

BULK
SIZES

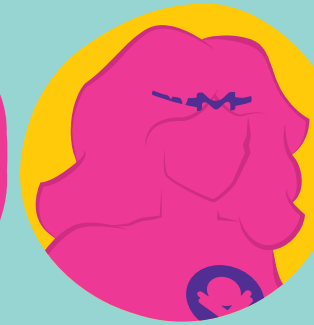

The name's **BULKY.**

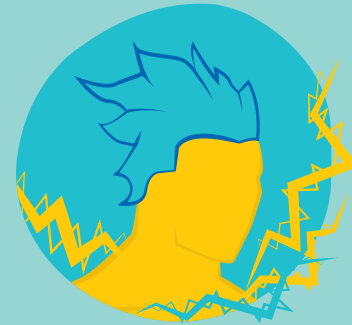

This is my only clue. Do you recognize him?

Jeepers! I know him. He goes to my gym. I'll take you to him.

Yes! Let's go! Timing is everything.

Did someone say time? I can help with that!

Bulky, Diagnostica and Rapido visit the gym to see Andy. He is a trainer, undeniably strong with muscles of steel. The group approaches him.

Hey Andy!
I have a friend
who needs to
talk to you.

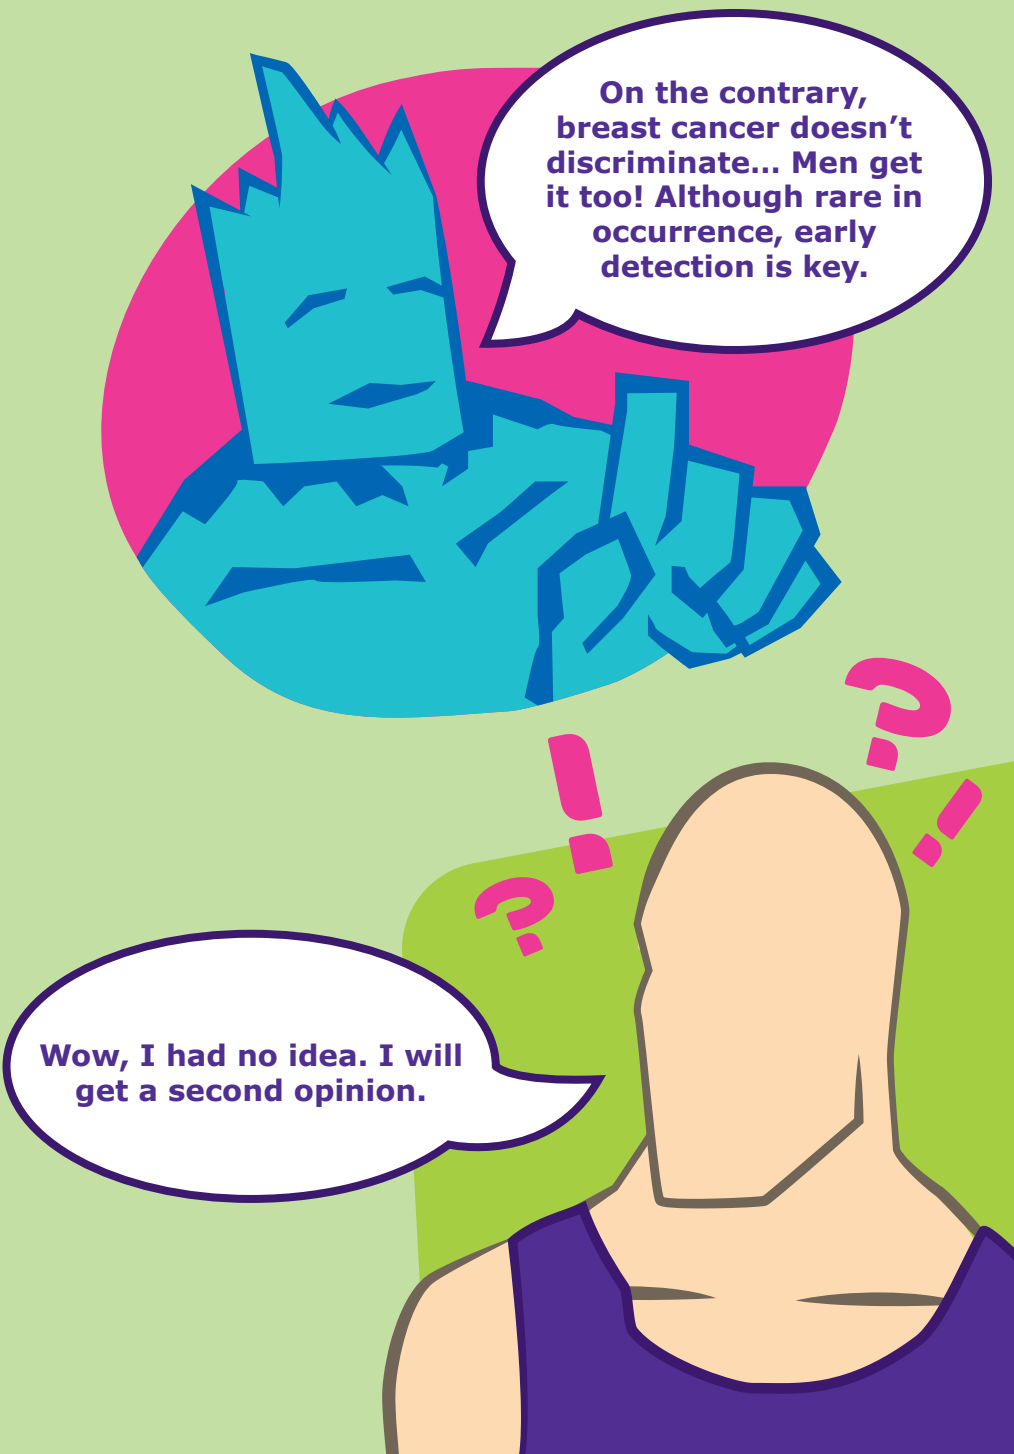

Nice to meet you, Andy; I'm
Diagnostica. My **STAFF OF TRUTH**
sent me your photo, which
caused concern for your health.
Have you noticed anything out of
the ordinary recently?

Actually, yes. I have a
lump in my chest. My
doctor suggests that it
is gynecomastia,
common among men
around here.

Has your doctor tested
the lump for breast
cancer?

No way!
Doesn't that only
happen in women?

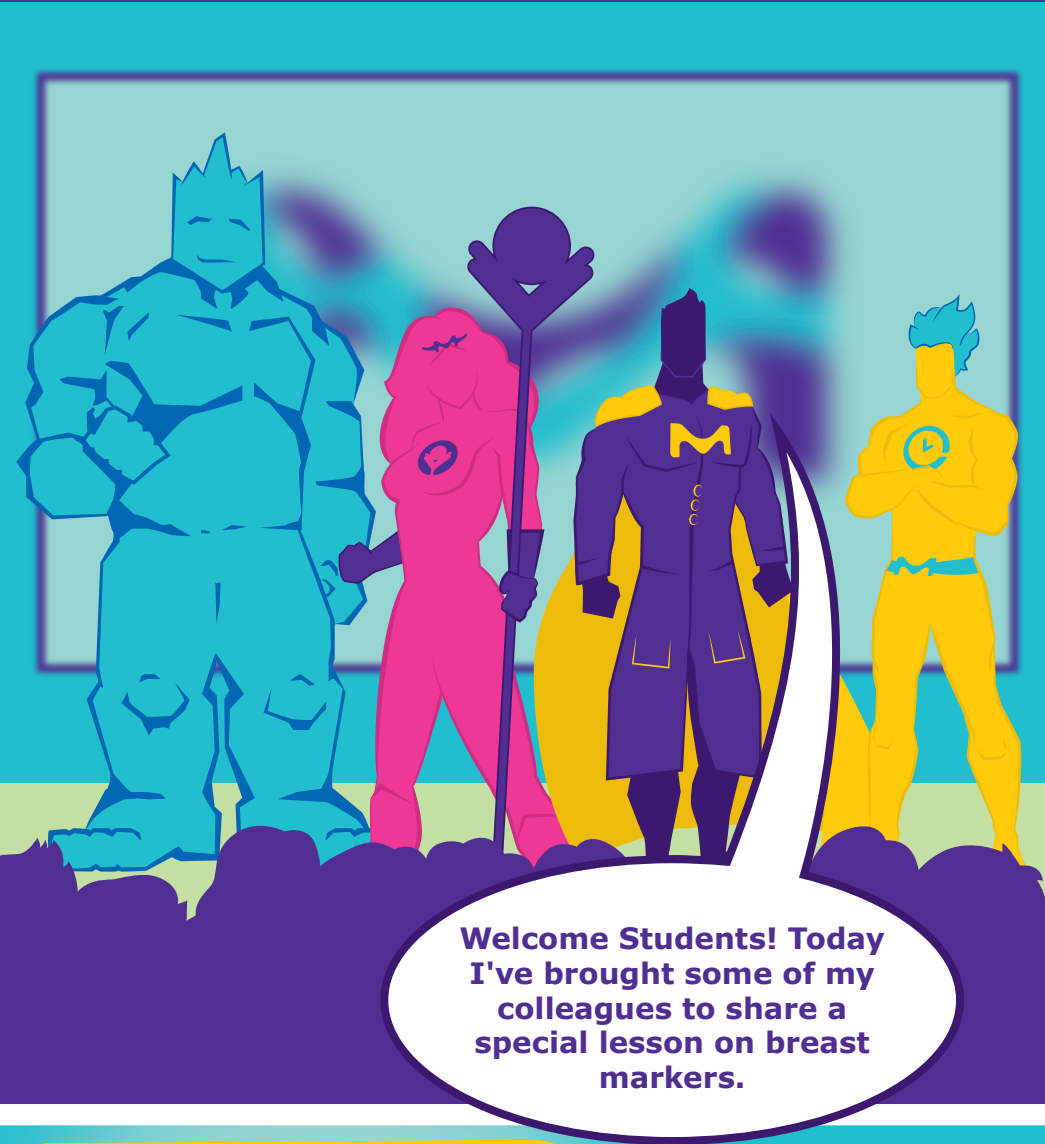

On the contrary, breast cancer doesn't discriminate... Men get it too! Although rare in occurrence, early detection is key.

Wow, I had no idea. I will get a second opinion.

Andy is in shock but expresses gratitude to the heroes for raising his awareness.

Two months later, Diagnostica, Rapido, and Bulky join Histoman for his morning histology class.

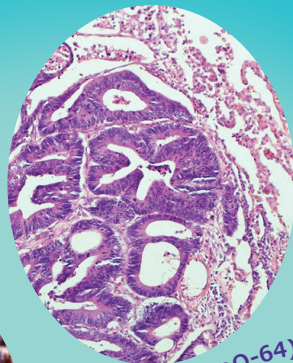

Welcome Students! Today I've brought some of my colleagues to share a special lesson on breast markers.

Just then, Diagnostica's staff begins to reveal a group of stained tissue...

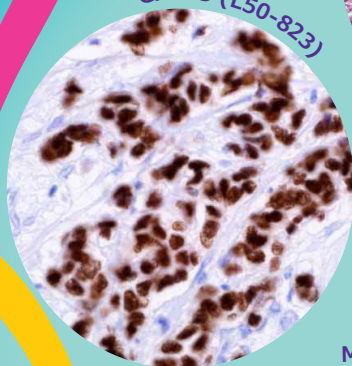

Ladies and gentlemen, these are stains used to detect breast cancer.

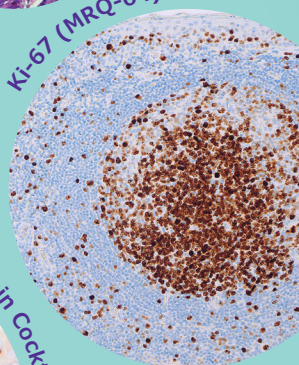

H&E

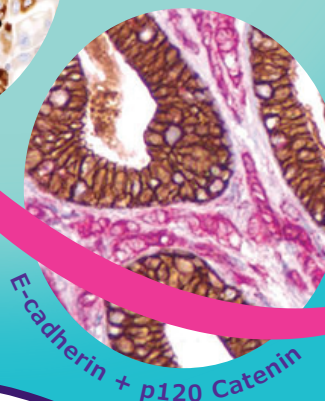

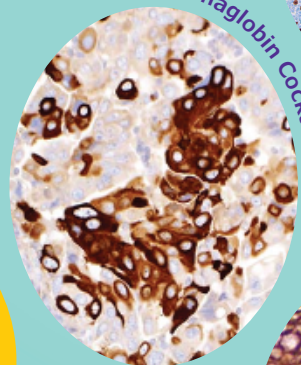

GATA3 (L50-823)

Ki-67 (MRQ-64)

Mammaglobin Cocktail

E-cadherin + p120 Catenin

From the classroom door, Andy enters to share his journey from diagnosis to treatment. Paying tribute to the heroes that helped save his life with early detection...

I was naive at first, and I wouldn't have known to get a lump tested without the advice and encouragement from this group of HistoHeroes.

Lets all raise breast cancer awareness, because **Men** get it too.

Great idea!

We'll spread the word!

We'd like to introduce you to our friend, Andy... a breast cancer survivor!

**YOU ARE THE
LAB HERO**
